PROJECTS

countdown timer

- This project involves creating a countdown timer using Python.
- The timer will count down from a user-specified number of seconds and provide a visual update each second.
- The project utilizes Python's built-in time library to manage the countdown and display the remaining time to the user.

Tic Tac Toe

- The game allows two players to take turns marking spaces on a 3x3 grid.
- The objective is to align three of their marks (either 'X' or 'O') horizontally, vertically, or diagonally.
- The project includes functions for initializing the game board, handling player input, checking for a win or a draw, and displaying the board.

password generator

- This project involves creating a Python-based password generator that produces strong, random passwords based on user-defined criteria.
- The generator uses Python's built-in libraries to ensure the passwords are both secure and customizable.
- This project demonstrates the application of randomness, user input handling, and string manipulation.

EDUCATION

2023 - Present	Bachelor's Degree, NBKR Institute of Science and Technology
2022	Class 12th, Board of Intermediate Education AP, 959/1000
2021	Class 10th, Board of Secondary Education AP, 586/600

SKILLS

Programming Languages	Python (Proficient), Java (Basic)
Libraries/Frameworks	NumPy, pandas
Tools/Technologies	Git, Jupyter Notebooks, VS Code
Soft Skills	Problem Solving, Team Collaboration, Continuous Learning
